

6th European Ambient Assisted Living Request for partnerships

Jan 2006
Confidential

Wandering elderly with Alzheimer's disease (AZD) and minor cognitive impairment (MCI)

What we offer potential partners

- **Technology**
 - Behavioral patterning
 - Power management
 - Location, and monitoring system integration based on hands-on know-how.
- **Know how**
 - Expertise in Alzheimer's, MCI, and Dementia-related illnesses.
 - System definition based on the requirements these diseases dictate.
 - Over 3 years of market investigation in this area.

3

What we need from a potential partner

- **European test bed for the technology**
 - Assisted living facilities
 - Nursing homes
 - Gated communities
 - Telecare, and health-monitoring companies
 - Government, and Non Government Agency stakeholders
- **Technology, and marketing partners to integrate into existing systems**
 - Integrators of healthcare systems
 - Sensors, and BioSensor developers, manufacturers
 - Cellular operators who wish to expand their service offering into monitoring and telehealthcare
 - MEMS development centers
 - Telehealth providers who wish to save resources.
- **Project Coordinators with proven experience in this market sphere**

We know our limits: Cannot lead the project.

4

Current status

- **Got an authorization to do a beta test in Israel's foremost geriatric mental hospital treating Alzheimer's and MCI**
- **In discussions with core technology partners who have expressed interest in moving forward with the project.**
- **Discussions with monitoring, and alert companies to sign on with our service.**
- **Preparing for an open-air beta test of the system.**
