

Enterprise Interoperability Cluster Workshop

Service Oriented Architectures

Cristina Martinez

Brussels, 8 February 2007

Cluster Overview

- Cluster activities
 - 8 FP6 projects so far, funding +/- 35.5 M Euro
 - 2 IP, 1 NOE, 5 STREPS
 - Results dissemination, Awareness-raising and FP7 input
 - EI roadmap

Re-shaping the cluster

- EI as part of a wider research concept
- Focus vs differentiation
- Benefiting from associated domains
- In 2006 : eGov, Content and Knowledge Technologies, Semantic Web, etc.
- More in 2007?

EI Research Roadmap

- Major deliverable of the cluster
 - > your Roadmap
- Input to FP7 Call 1 Objective 1.3
 - Vision, technology trajectories, from research to value
 - 3 out of 4 grand challenges in Call 1
- Available on Cordis
- Available for improvement

Project involvement for 2007

- Within the cluster
 - Publicise individual and cluster results
 - Complete, deepen, enlarge EI roadmap
 - Ongoing reorientation & prioritization for FP7
 - Provide the rationale: business models for interoperable products and services
 - Community is enlarged > how to maintain/nurture it?
- Beyond the cluster
 - EI research part of SEASIDE, NESSI Technology Platforms > which possible links?
 - Links with other research domains, other communities, standardization bodies

House keeping rules

- Coffee & lunch breaks: see agenda!
- Please respect the schedule
- Q&A session after each presentation
- Next cluster meeting: I-ESA 07 Madeira
- Have a nice workshop!
