

# Objective 2007.1.3. INFO DAY

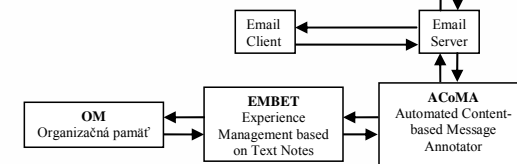

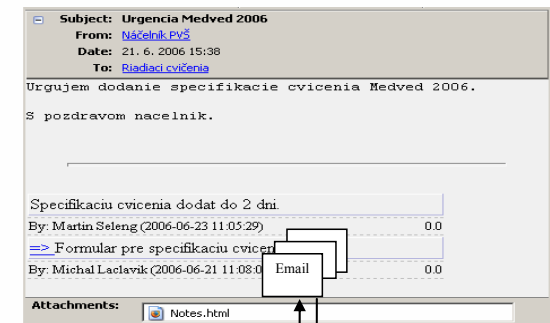

Networked Enterprise and Radio  
Frequency Identification" Unit

Brussels, 9 February 2007

# System supporting network enterprise business activities via electronic communication

- Network Enterprise or especially SME:
  - Business activities (CRM, ERP, workflow, document flow) are done using , MS Office, email and internet
  - Information overload
  - Need for active and context sensitive information provision
  - System which can evolve with organization
- Objectives
  - To create framework supporting business activities, collaboration and information sharing in network SMEs
  - Information resources processing (documents, communication, intranets, databases)
  - To deliver information to user in context
- Potential Innovation
  - Content in Context => email as context sensitive medium for information provision
  - Extendable templates for different business models
  - Not changing way of working in organization

European Commission  
Information Society and Media

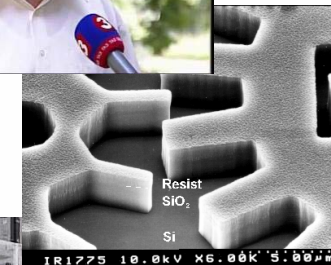

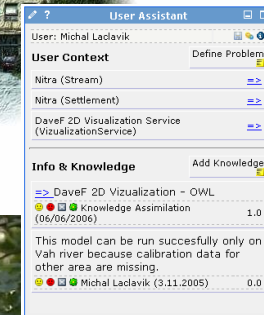

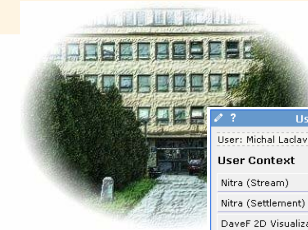

## Future steps

- Looking for partners:
  - Academic (business oriented modelling, information processing, semantic web)
  - Industrial (SMEs, applications, development)
- Contribution to other proposals in areas:
  - Collaboration and information sharing
  - Information processing and active context sensitive information provision
